

About EyeSee

EyeSee is a cutting edge market research company that maximizes the effect of marketing communications with online eye tracking and facial coding. We have developed an innovative, online, webcam-based eye tracking platform to track people's eyes with their laptop and webcam at home. This innovative approach is faster (a few days), scalable (N and global) and more cost-effective (2-3 times) than conventional solutions which use specific hardware and software on a central location. Our experienced research team converts the obtained data into actionable insights. EyeSee is based in Belgium, Serbia and the USA. We work for leading brands in the retail, FMCG, Telco and banking industries. Find out more at www.eyesee-research.com.

If you believe that you comply with the terms, apply for the position:
